Part III DETAILED ACTION

1. Upon further consideration the restriction requirement set forth previously has been removed. A new restriction requirement has been set forth below.
2. Claims 7-14 are pending.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 7-11, drawn to a method of treating stroke comprising administering α_2 -antiplasmin neutralizing antibodies

Group II, claim(s) 7 and 12-14, drawn to a method of treating stroke comprising administering plasmin or plasmin derived peptides.

4. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: WO 98/12329 teaches a method of treating stroke comprising administering α_2 -antiplasmin neutralizing antibodies. Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have single general inventive concept and lack unity of invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
